

### Serious about ANPR. Serious about Service.

SpeedPlate™ holds BOF Web Services accreditation, allowing all customers to meet National ACPO ANPR Standards™. SpeedPlate™ is the most intuitive and feature-rich user interface available for mobile ANPR.

Providing all of the basic features one would expect, and adding in some innovative and exclusive features only from NDI, SpeedPlate is designed for easy and efficient operation with minimal training. SpeedPlate is a clean and user-friendly interface for your NDI Mobile ANPR system, providing visibility to alerts, reads, and much more.

The key to any successful system is the ease with which it can be incorporated into normal day-to-day operations. SpeedPlate is optimised to work on a touch-screen monitor, or may also work with an in-vehicle laptop or mobile data terminal (MDT) without affecting other mission critical operations.

### Key Features:

- » Single screen visibility to captured plates and colour coded alerts
- » BOF Web Services accredited to meet National ACPO ANPR Standards
- » Large, high contrast buttons for touch screen operation
- » Seamless two-way communication with VISCE™ Back Office

**Serious about ANPR. Serious about Service.**

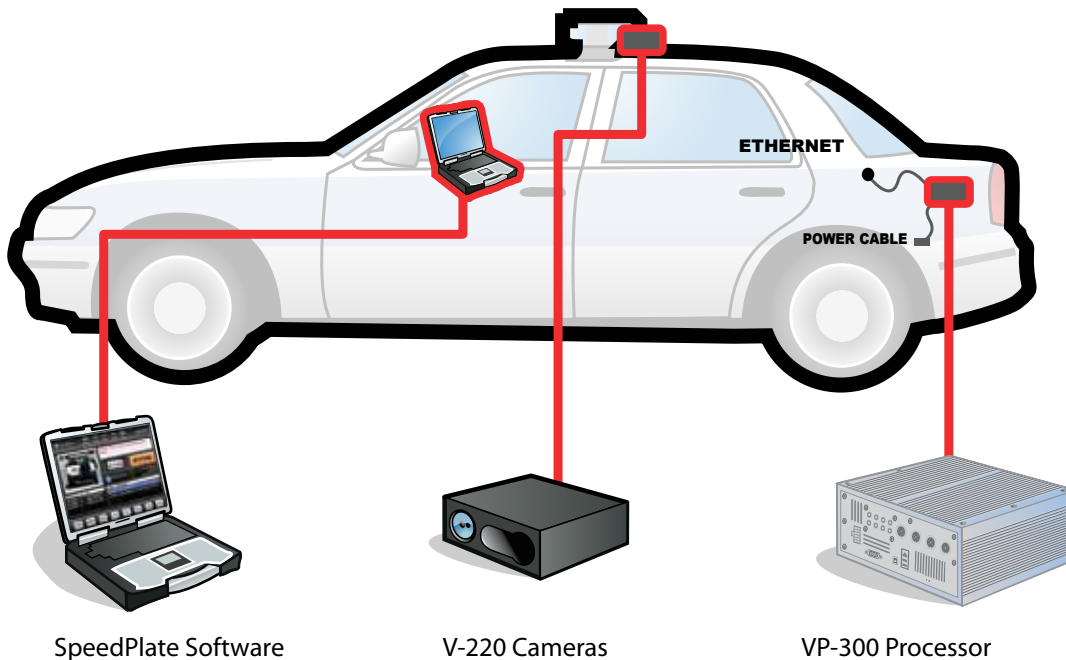

## Hotlist and Alert Management

SpeedPlate™ provides colour coded hotlist management and alarm identification. This enables the operator to define the importance of the alarm, the alarm type and the type of audible alert, ensuring that officers on patrol have intuitive visual and audible clues to aid them in the appropriate response.

## NDI Mobile ANPR System

Permanently installed on a vehicle, this rugged configuration ensures fast operation and lasting performance.
