

## Serious about ANPR. Serious about Service.

VeriPlate™ is the most intuitive and feature-rich user interface available for mobile ANPR / ALPR.

Providing all of the basic features one would expect, and adding in some innovative and exclusive features only from NDI, VeriPlate is designed for easy and efficient operation with minimal training. VeriPlate is a clean and user-friendly interface for your NDI Mobile ANPR / ALPR system, providing visibility to alerts, reads, and much more.

The key to any successful system is the ease with which it can be incorporated into normal day-to-day operations. VeriPlate is optimized to work with your existing in-vehicle laptop or mobile data terminal (MDT), seamlessly integrating with other systems while not impacting mission critical operations.

## Key Features:

- » Single screen visibility to captured plates, hotlists and alerts
- » Large, high contrast buttons for touch screen operation
- » Common misreads presented to officer for quick, one-touch misread correction
- » MapMe and MapIt features to map patrol vehicle or selected read / alert
- » Live Check feature to conduct wireless real-time check on selected plate against state criminal justice network
- » Intelligent hotlist synchronization updates only changed records and provides record of last update and last sync
- » Seamless two-way communication with VISCE™ Back Office

**Serious about ANPR. Serious about Service.**

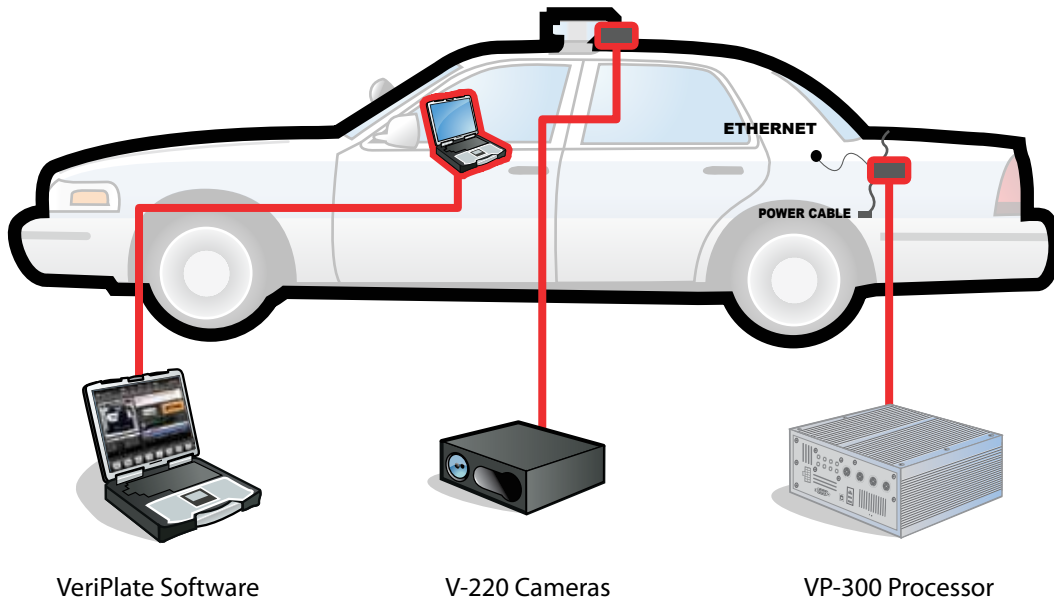

**Alerts the way you need them**

VeriPlate™ is designed to work in the background, allowing the officer to use other systems for standard patrol operations. A match of a license plate against a hotlist will generate an alert screen and audible tone to indicate a vehicle of interest. VeriPlate™ offers multiple alert types with optional alert delivery methodologies as seen below.

**NDI Mobile ANPR / ALPR System**

Permanently installed on a vehicle, this rugged configuration ensures fast operation and lasting performance.

VeriPlate Software

V-220 Cameras

VP-300 Processor
